In the event of a conflict between the original English version of this Whitepaper and it's alternative versions created in other languages, the English version of White Paper shall prevail. The information contained herein may be subject to change.

Introduction

What is ClassicDoge?

ClassicDoge is a pet eccentric social app and NFT marketplace giving pet lovers a way to mint their favorite memories to share and sell. ClassicDoge aims to provide the infrastructure to schedule, track, and maintain all aspects of our pets' lives. ClassicDoge intends to keep up to date when our furry friends will meet with vets, take their medicines, and attend their playdates. ClassicDoge also looks to be instrumental in assisting in the adoption and overall placement of homeless pets. We would like to think of ClassicDoge as the "MYHealth" equivalent for pets. ClassicDoge will very quickly become the go-to platform for household pet information. ClassicDoge is one of the very few tokens that can be used as a practical utility.

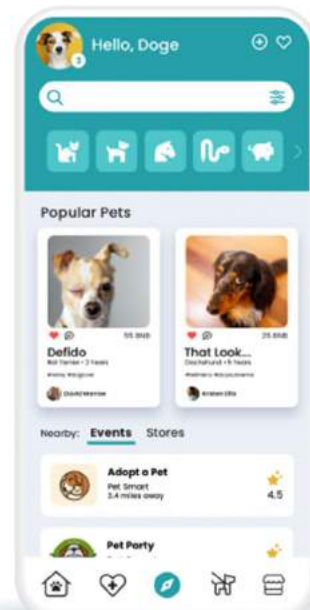

Platform

Why use ClassicDoge?

Imagine a place where all your pet's health and shot records are stored in an environment that's accessible at the tips of your fingers. Not only are these records always at your disposal, but they are also highly secured because the records are stored using blockchain technology. These are just some of the features that ClassicDoge will offer. This platform will be the companion of all social media applications in play today. We love our pets because they're our children and we would love to share these special moments that we create with them, with the rest of the world.

We, at ClassicDoge, understand that we need a platform that caters to people looking to connect with pet lovers that remind them of themselves, and we believe that this technology will bring all of these factions of people together. ClassicDoge will also offer a pet marketplace, virtual vet visitations, an extensive library of pet specific recommended treatments for various ailments, and test/lab results. The pet marketplace will allow our community to buy/sell accessories all in one location. Through records stored on individual pet's NFT, the ClassicDoge marketplace will also allow a secure marketplace for Breeders. This token represents the future and the future is approaching quickly.

Community

We want to build a community. We are looking to have individuals that understand this NFT and are willing to back it in a way that screams out to the rest of the world that we are here. We want to ensure that our community is loud, and we are heard. This is the platform that we have all been waiting for and it only succeeds with the help of all of us. We are 100% confident that this project will be successful, and we will continue to put our community first because we know the importance of each and every one of you.

Token Metrics

We will begin our initial offering of ClassicDoge through our website (<https://classicdoge.io>). This initial offering will be available through crowdfunding and once this period is over ClassicDoge will be slated for purchase/trading on the pancake swap platform. Because of the overwhelming support that this project has received, we look to offer our crowdfunding by December 1, 2021.

Token Information:

Token name: ClassicDoge

Token symbol: XDOGE

Decimals: 18

Contract Address:
Binance Smart Chain (BSC) BEP20
0xb68a34756d8a92ccc821effa03d80
2846594b64e

Crowdfund Information:

Token rate: 5,000,000 Per 1 BNB

Hard cap tokens: 16,000,000,000
(After reaching this number sale will be stopped automatically)

Soft cap tokens: 2,200,000,000

Minimum: 0.01 BNB

Maximum: 100 BNB

Frame Work

When it comes to managing your pet’s health, it’s important to stay informed and organized. ClassicDoge will make keeping track of your pet’s health more safe and secure by putting all of their necessary information in one place. It’s a great tool for anyone with a single pet, multiple pets, anyone who travels with pets, and those with multiple pet care providers including veterinarians, groomers, walkers, sitters, and more.
