Staking Platform

What is Staking?

For a lot of traders and investors, staking is the key method of earning rewards for holding cryptocurrencies.

The reason your crypto earns rewards while staked is because the blockchain puts it to work. Cryptocurrencies that allow staking use a “consensus mechanism” called Proof of Stake, which is the way they ensure that all transactions are verified and secured without a bank or payment processor in the middle. Your crypto, if you choose to stake it, becomes part of the most secure investment process, the decentralized blockchain.

The screenshot shows the ClassicDoge website's 'Staking Pools' section. At the top, there's a dark blue header with the ClassicDoge logo on the left and a 'Connect Wallet' button on the right. Below the header, the main content area has a light blue background. The title 'Staking Pools' is centered, followed by the subtitle 'Earn While Invested with the ClassicDoge Staking Pools. [Learn more](#)'. A section titled 'Active Staking Pools' with an upward arrow icon contains three cards. Each card represents a staking pool: 'Original Doge' (UNLOCKED, Min. Stake 5,000,000, 200% APY, Limited Time Only!), 'Milo' (UNLOCKED, Min. Stake 25,000,000, 150% APY, Start Earning Today!), and 'Tiger' (LOCKED, Min. Stake 50,000,000, 200% APY, Start Earning Today!). Each card has a circular profile picture of a dog, a green 'Unlock Wallet' button, and links for 'Manual' and 'Details'. Below the active pools, a section titled 'Retired Pools' with a rightward arrow icon is visible.

Many long-term crypto holders look at staking as a way of making their assets work for them by generating rewards, rather than collecting dust in their crypto wallets.
